

# HONEY BEE ...HONEYCOMB CELLS AND NESTING

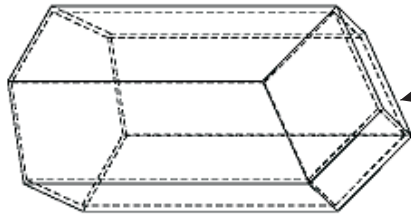

THIS ENERGETIC SYSTEM IS IN THE CORE OF THE NEW "LIVING ARK" WHERE THE "HONEY" IS SAPHRA LIGHT "the way to Divinity or Sacred Unity."

**"Understand that the TRUE meaning of the Flower of Life or the Sapha is not a series of lines to be traced on a grid, but the pattern in the HEART that leads through the Mother (Queen) to the Son (King) in the body, mind and soul.**

(ThothHorRa Khandr/Maia Kamala, translator)

The closed ends of the honeycomb cells are also an example of geometric efficiency, albeit three-dimensional and little-noticed. The ends are trihedral (i.e., composed of three planes) pyramidal in shape, with the dihedral angles of all adjacent surfaces measuring  $120^\circ$ , the angle that minimizes surface area for a given volume. (The angle formed by the edges at the pyramidal apex is approximately  $109^\circ 28' 16''$  ( $= 180^\circ - \arccos(1/3)$ )).

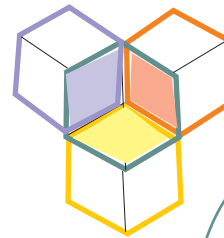

From Wikipedia, the free encyclopedia

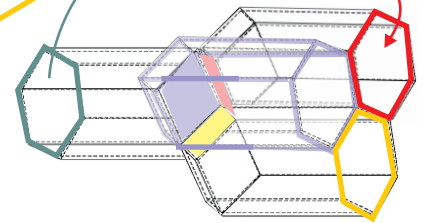

The three-dimensional geometry of a honeycomb cell.

NOTE THE 3 RHOMBUSES;

(HOW WOULD THIS AFFECT DIFFRACTION THROUGH THE CRYSTAL?)

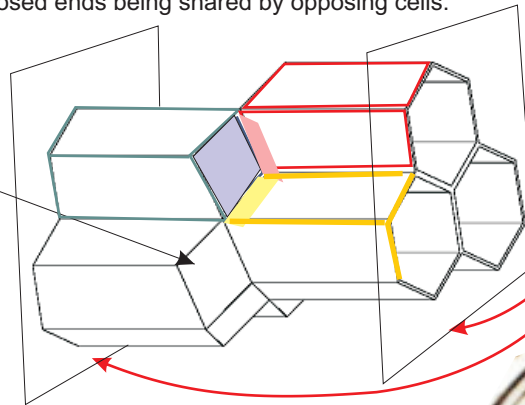

THIS CELL INTERFACES WITH 3 OTHERS

The shape of the cells is such that two opposing honeycomb layers nest into each other, with each facet of the closed ends being shared by opposing cells.

CENTRAL LAYER OF RHOMBIC UNITS. EACH RHOMBUS IS THOUGHT TO BE AN EYE OF RA GATE/PILLAR SYSTEM.

THIS "OVERLAPPING" EFFECT INTERFACES AND UNIFIES THE COMPLEMENTARY PLANES HEX CELLS.

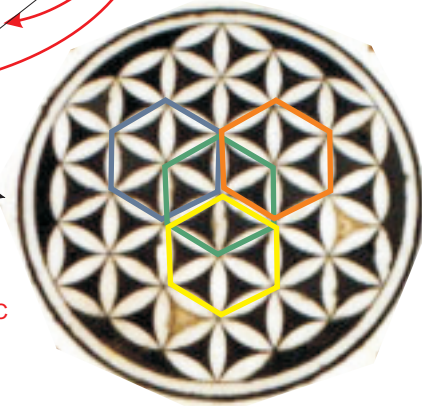

TWO PLANES FORM THE TELEPLANE DYNAMIC IN THE "HIVE" (PARABOLIC CURVE IN THE RESHEL).

Opposing layers of honeycomb cells fit

CENTRAL RHOMBUS "OVERLAP" EFFECT IN THE CENTER PRODUCES THE "FLOWER OF LIFE" IN THE TWO HONEYCOMB PLANES OR "TELEPLANE."

THE STAR OF DODE CREATES THE STAR TETRAHEDRON WHICH GENERATES THE TETRANOME AND TETRATRYON. THIS PROVIDES THE CRITICAL SPINNING TELEDISK, PILLAR-AXIS, AND A RHOMBUS IN THE CENTER. THE RHOMBUS, ALSO FOUND IN THE BASE OF THE HEX-CELL, IS THE UNIVERSAL GATE/PILLAR OR COMMUNICATIONS AND TIME TRAVEL SYSTEM. THE HEX-CELL CAN CONTAIN MANY TELEPLANES IN HARMONIC COMBINATIONS WITH THE OTHER CELLS USING THE RHOMBUS' TO COMMUNICATE.

*akashic definition of:* Tetranome

A high-Metatronic (full Light) creational field generator. The active modality of the tetranome begins with a Star of David and expands from the center outward at two opposite axis to create a sigel or spinning energy field Such a field produces a flashing rhombis at its center that exchanges "information" between universes. In a further stage of the expansion, the tetranome becomes a tetratryon. Tetratryons are hyperspace tetrahedrons with open ends connecting to one another to form dimensional transference zones. It is through the tetratryons that energy travels between different dimensions. The tetranome exchanges information and therefore "building blocks" of Light mathematics. The tetratryon accelerates the whole dynamic to allow manifestation energy to travel from one dimension to another. However, one cannot really separate a tetranome from a tetratryon, as the former is simply a foundational stage of the latter, and the latter CAN BE ACTIVATED through the geometry of the former. The ascension of this earth into the New Earth Star will be created through tetratryonic activity. (ThothHorRa Khandr /Maia Kamala)
